RYAN W. WUCKERT

AI Pipeline Architect & ComfyUI Specialist | Broadcast-Proven AI VFX | 17-Year Film Production Veteran

Winnipeg, MB, Canada (Remote — Global) | ryanwuckert@gmail.com | +1 204-962-0369 GitHub: github.com/moviecolor | IMDb: imdb.com/name/nm2344474 | LinkedIn: linkedin.com/in/ryan-w-wuckert-58121034

SUMMARY

AI pipeline architect and ComfyUI specialist with 17 years in film and television production (IATSE 669/667 DIT). I build production-grade, air-gapped generative AI pipelines — image, video, voice cloning, lip sync, character consistency, and LoRA training — for teams that need reliable output. Produced AI-generated footage for Amazon Prime/CTV and created the AI VFX "baby shots" that aired on CTV/CW's *Acting Good*. Recent client work delivered 20+ product-consistent ad variations and 3.2x higher retention. I bridge cinema-grade production discipline and open-source AI.

CORE SKILLS

ComfyUI & Generative AI: ComfyUI workflow design, custom nodes, Prompt Relay, ControlNet Union; FLUX.1 (dev, Kontext, Klein), SDXL, Wan 2.2/2.1, LTX 2.3, Hunyuan, Z-Image-Turbo, Qwen-Image, Kling, Runway, Seedance, Higgsfield; LoRA training; character sheets and identity-preserving pipelines; text-to-image, text-to-video, image-to-video, video-to-video, video extension; Qwen3-TTS voice cloning, multi-character dialogue, lip sync; air-gapped local inference; prompt engineering.

Engineering & Automation: Python, Flask, Node.js/Express, Docker, REST APIs, LAN networking, Whisper AI, Web Audio API, SwiftUI/SwiftData (iOS), AppleScript, Mac Automator, Git/GitHub.

LLM & Agents: Ollama, OpenCode, Qwen Coder, DeepSeek, local LLM agents, agentic tool use, model quantization and VRAM optimization.

Film & Color: DaVinci Resolve, Pomfort LiveGrade, ARRI Look Creator, Final Cut Pro, Photoshop; live grading, LUT creation, dailies, color science, ARRI/RED/Sony workflows, broadcast QC.

EXPERIENCE

Video Producer — Self-Employed | Remote | 2023 – Present

- Produced AI-generated augmented footage for **Amazon Prime/CTV** using ComfyUI + Flux.
- Created **20+ fashion handbag ad image and video variations** (Qwen/WAN 2.2) with **100% product consistency**, driving **3.2x higher retention** in DaVinci Resolve.

AI Specialist — Movie Color | Remote / B2B | 2024 – Present

- Design and deliver 100% offline, air-gapped AI production pipelines for studios and creators under strict NDAs — no cloud APIs, no telemetry, no client assets leaving the local network.
- Secured **written commercial authorization from MiniMax** for local, air-gapped **MiniMax H3** deployment (entity: Movie Color) under the US$20M Community License threshold — no API or per-seat fees.
- Built end-to-end generative systems: text-to-image, text-to-video, image-to-video, video-to-video, video extension, voice cloning, lip sync, and character-consistent multi-shot sequences.
- Engineered a local voice pipeline (Qwen3-TTS) that clones a voice from a short sample, generates multi-character dialogue, and feeds Wan Multitalk for talking-head video — fully on-premise.
- Trained custom LoRAs and built character-sheet workflows for consistent characters and styles across scenes.
- Ship production tools: **ReMyk** (remote voice dictation; Flask, Whisper, LAN relay, ~2s round trip), the **DIT UnGRADE Tool** (Python; on-set grades back to camera LOG; Alexa/Sony LUT support), and **Langly** (two App Store-approved iOS learning apps; SwiftUI + local LLM agents).

AI VFX Animator (ComfyUI) — Acting Good, CTV / CW | Urban Post | 2025

- Created the AI-generated "baby" VFX shots in ComfyUI for broadcast episodes of *Acting Good* (CTV/CW), delivered through Urban Post to network specification.
- Worked inside broadcast delivery standards: shot matching, resolution/frame-rate compliance, QC, and revision cycles with post-production supervisors.

Content Developer / Camera Operator / Colorist — Lucky 9 Productions Inc | 2015 – Present

- Social media video strategy, content concept production, cinematography, camera operation, DIT, and post-production color correction for agency and corporate clients.

Digital Imaging Technician (DIT) — IATSE 669 & 667 | 2010 – Present

- 16+ years as a main-unit DIT on features and series for Universal, Netflix, Amazon, Sony, Lionsgate, CBS, CW, CBC, eOne, Technicolor, and Deluxe.
- Real-time image pipelines under deadline pressure; secure multi-destination backups (MD5), QC, live grading, LUTs, dailies, metadata, and closed-network video for directors and DPs.
- Cameras: Panavision DXL2, ARRI Alexa (regular/anamorphic), Alexa 4:3, Alexa Studio, Alexa Mini, RED One/MX/EPIC/Dragon/Helium, Phantom 4K, Sony F55.

SELECTED CREDITS

- **Acting Good** — CTV / CW / Buffalo Gal — 2025 — AI VFX Animator (ComfyUI) + DIT (S1/S3/S4)
- **The Long Walk** — Lionsgate — 2025 — DIT (Alexa 35; DP Jo Willems ASC, SBC)
- **Holiday Shift** — CBS / Roku — 2023 — DIT, all 10 episodes
- **Spencer Sisters** — eOne / CTV / CW — 2022 — DIT, all 8 episodes
- **Violent Night** — Universal / 87North — 2022 — DIT
- **Nobody** — Universal / 87North — 2022 — DIT
- **The Ice Road** — Universal — 2021 — DIT
- **Tales from the Loop** — Amazon — 2020 — DIT, pilot + all episodes
- **Fracture** — Netflix — 2019 — DIT
- **The Porter** — CBC / BET — 2019 — DIT, all episodes

PROJECTS

- **ReMyk** — Remote voice dictation over LAN. Flask/Python, Whisper AI, Web Audio API, zero-install browser client, ~2-second round trip. github.com/moviecolor/Remote-Mic-Dictation-Sever
- **DIT UnGRADE Tool** — Python color utility that reverses on-set grades to camera LOG for portfolio comparison; LUT support for Alexa Classic, Alexa 35, Sony Venice. github.com/moviecolor/ditungrade
- **Langly** — Two iOS language-learning apps approved by the Apple App Store, built with SwiftUI/SwiftData and local LLM agents.
- **Fraturday** — Wrap-clock iOS app: turnaround tracking, call-sheet reading, commute and alarm planning for film crews.

CERTIFICATIONS

- **Generative AI: Elevate your Software Development Career** — IBM — Jun 2026 — Credential H7VMGO0Y0IPL
- **Prompt Engineering for ChatGPT** — Vanderbilt University — Jun 2026 — Credential 5JWAUJ7OEH5S
- **Introduction to Generative AI for Software Development** — DeepLearning.AI — Jun 2026 — Credential BP0DGC6M9PJ9
- **Google AI Fundamentals** — Google / Coursera — Jun 2026
- **IBM — Generative AI** — Agentic Workflows, Prompt Patterns, Software Architecture, DevSecOps, LLM Applications — Jun 2026
- DIT Training — Sim Video (2010); RED Post Production (2010); Phantom Capture (2011); Advanced Color Theory — Jostens (2001)

EDUCATION

University of Manitoba — 4-Year Advanced Bachelor of Anthropology (Forensic, Physical, Cultural); Minor: Film Studies — 1992–1997 **Vanderbilt University** — Prompt Engineering / Computer Science — Jun 2026 (Grade: 99)

LAB

RTX 5090 (32 GB GDDR7) · Intel i9-14900K · 96 GB DDR5 · ComfyUI local loop (air-gapped) · Mac Studio M2 Ultra (128 GB) for color and finishing
